- Worked on the design ,testing, and troubleshooting of electrical circuits and embedded systems for industrial applications.
- Assisted in the installation,maintenance , and calibration of electronic equipment ,ensuring system reliability and performance.

EDUCATION

B.Tech in Electronics and Communication Engineering (ECE)

Vikas Group of Institutions | Graduated 2016

MERN Stack Developer Certification

BRN Infotech, Hyderabad

PROJECTS

Human Resource Management System (HRMS)

- Designed and developed a full-featured HRMS with modules for employee data, leaves, roles, and reports.
- Integrated JWT authentication, MongoDB aggregation, and RESTful APIs.
- Built with React.js, Node.js, Express.js, and MongoDB.

Food Ordering Application

- Developed a restaurant app with Add to Cart, Payment, and Order Tracking features.
- Used Redux for state management and Bootstrap for modern UI design.
- Implemented admin dashboard for menu management and order reports.

Real-Time Chat Application

- Built one-to-one real-time messaging using Socket.io, Node.js, and MongoDB.
- Ensured secured chat through token-based authentication and managed chat history in MongoDB.

Responsive Website Designs

- Designed and deployed multiple static and dynamic websites using MERN stack, ensuring responsiveness and SEO optimization.

SKILLS

- Languages: HTML, CSS, JavaScript
- Frontend: React.js, Redux, Bootstrap
